√s = 13.6 TeV
CMS
Simulation Preliminary
HH→ 2b2τ_had with κ_λ = 1
HH or τ_had,E_T^miss-triggers: ε(HH→ 2b2τ) = 58%
HH trigger: ε(HH→ 2b2τ) = 43%
τ_had-triggers: ε(HH→ 2b2τ) = 34%
E_T^miss-trigger: ε(HH→ 2b2τ) = 3%
Event selection: ≥ 2 jets, p_T > 20 GeV, |η| < 2.5, loose b-tagging,
≥ 2 τ with p_T > 20 GeV and |η| < 2.5, loose τ-identification
